- Highlight: **oem decorative pvc foil,**
oem wood grain pvc film,
100m decorative pvc foil

Product Description

Product Description:

Material: Our PVC foil is primarily made of *Polyvinyl Chloride (PVC)*, a synthetic plastic material known for its durability, flexibility, and ease of processing.

Appearance: Our PVC foil comes in a wide range of colors, patterns, and textures. It can imitate the look of natural materials such as wood, stone, fabric, or metal, providing a cost-effective alternative to these materials while preserving its high-quality aesthetic.

Versatility: Our foil is suitable to be applied to various surfaces like doors, cabinets, furniture, walls and more. It sticks well to different substrates and can be used in multiple areas indoors.

Durability: Realsun Deco PVC foil is renowned for its resilience and strength. That is why it is usually used in high-traffic locations.

Maintenance: Our PVC foil calls for little maintenance once installed. It is a breeze to take care of and usually just needs to be scrubbed once a week with a moist cloth.

Cost-effective: The affordability of PVC decorative foil when compared to natural materials is one of its main selling points. It allows for upscale looks without incurring the related costs.

Modification: Manufacturers provide a whole range of styles and finishes that can be modified to meet project requirements and personal design preferences.

Application: Decorative PVC foil is commonly used for residential and commercial purposes such as kitchen and bathroom cabinets, interior doors, wall panels, furniture surfaces, store displays, and more.

Technical Parameters:

Wood Grain Vinyl Flooring

We offer a wide selection of high-quality wood grain vinyl flooring in a variety of thicknesses, widths, lengths, and designs. With thickness ranging from 0.1mm to 0.5mm, different widths of 1260mm and 1400mm, lengths from 100 to 400m roll, and hundreds of wood grain designs to choose from, our vinyl flooring is sure to fit any decor. Plus, we offer a number of different surface treatments: matt, super matt, embossed, high gloss, and soft touch. We offer both OEM and ODM service, as well as customized solutions, which can all be tailored to suit your individual needs.

Applications:

Product Description

Our PVC foil is comprised of Polyvinyl Chloride (PVC), an artificial plastic material renowned for its durability, flexibility and ease in processing. It comes with a variety of colors, patterns and textures, and can imitate the look of natural materials such as wood, fabric, stone and metal, while providing a cost-efficient substitute. Our foil can stick on different substrates and can be applied for various purposes in the interior. It has a high level of durability and demands minimal maintenance. Realsun Deco PVC foil is a reliable material that can handle high-traffic areas, as well as being low-cost in comparison to natural materials. Customers are also able to modify the foil to match project specifications and personal design preferences, making it suitable for a range of applications such as doors, cabinets, furniture, walls, retail shelves and more.

Technical Parameters

Our PVC foil has a thickness varying from 0.1 to 0.5mm with widths of 1260mm and 1400mm, and lengths of 100 to 400m roll. To meet project specifications and personal design preferences, it comes with designs such as wood grain, solid color, marble, brick and other designs. Additionally, the surface treatment includes matt, super matt, embossed, high gloss and soft touch.

Application

The application of decorative PVC foil is done with different methods to suit several uses. For covering MDF, particleboard, wooden boards and fiberboard, membrane press (vacuum press) is employed and used for doors, kitchen cabinets, wardrobe, furniture and so on. PVC profiles, wood profiles, aluminum profiles are all covered when wrapping profiles, while cold laminating is used for covering flat panels like wood panel, steel panel, aluminum panel and PVC panel. Similarly, hot laminating can be used for PVC panel, steel panel and aluminum panel. Self-adhesive is applied to any smooth surface, for furniture and indoor decorations.
