- Color: White, Red, Blue, Green, Yellow, Black, Cream Etc.
- Highlight: **Blue High Gloss PVC Laminate Sheet,**
MDF Board pvc high gloss sheet,
MDF Board glossy pvc sheet

Product Description

Product Description:

PVC Decorative Foil for Interior

Our pvc foil is primarily made from Polyvinyl Chloride (PVC), a synthetic plastic material known for its durability, flexibility, and ease of processing.

It is available in a wide range of colors, patterns, and textures, taking the form of natural materials such as wood, stone, fabric, or metal, providing a cost-effective alternative to these materials while retaining a high-quality aesthetic.

Moreover, it can be applied to various surfaces, including doors, cabinets, furniture, walls, and more; and can be used in all areas of the interior. Realsun Deco PVC foil is renowned for its resilience to deterioration and strength, thereby making it suitable for high-traffic locations.

Plus, it requires little effort to maintain; just needs to be wiped down once a week with a moist cloth. Its affordability in comparison to natural materials is also one of the main benefits, so that creating upscale aesthetics is no longer a difficult task.

A large range of style and finish are available from manufactures, allowing customers to adjust to meet project specifications and personal design preferences.

Commonly used in residential and commercial settings, this innovative material can be used for furniture surfaces, kitchen and bathroom cabinets, wall paneling, interior doors, retail displays, and many more!

Technical Parameters:

We offer a wide array of laminate thicknesses ranging from 0.1mm to 0.5mm.

Our laminates come in widths of 1260mm and 1400mm.

Each roll of laminate can be customized to fit your specific needs, and comes in a range of 100-400m.

We offer a variety of laminate designs to choose from, including Wood grain, Solid color, Marble, Brick and more.

Our laminates come in several different surface treatments, such as Matt, Super matt, embossed, high gloss and soft touch.

We are dedicated to our customers and offer OEM and ODM services.

Applications:

Membrane Press (vacuum press): The thickness can range from 0.20-0.50mm with a width of 1260mm and 1400mm. Length is 100-300m per roll. This process is suitable for covering on MDF, particleboard, wooden board, and fiberboard etc, and is used for doors, kitchen cabinets, wardrobes, and furniture. It can also cover embossed board and cover five surfaces at the same time.

Wrapping Profiles: The thickness can range from 0.12-0.18mm with a width of 40-1260mm. Length is 300-800m per roll. This process is suitable for covering all kinds of profiles including wood profile, aluminum profile, PVC profile, etc. These are used for door frames, window sills, base channel, PVC ceiling and so on.

Cold Laminating: The thickness can range from 0.12-0.20mm with a width of 1240-1260mm and a length of 300-500m per roll. It is suitable for covering on all kinds of flat panels such wood panel, steel panel, aluminum panel, PVC panel etc. for doors and furniture.

Hot Laminating: The thickness can range from 0.16-0.30mm with a width of 1260mm and a length of 200-300m per roll. This process is suitable for covering on the PVC panel, steel panel, and aluminum panel for doors, skirting and so on.

Self-adhesive: The thickness can range from 0.10-0.20mm with a width of 600mm/1220mm and a length of 5-50m per roll. It can be put on any smooth surfaces and used for furniture and indoor decorations.

Customization:
