- Highlight: **1400 Mm PVC Lamination Film,**  
**1400mm Wooden Pvc Foil,**

## Product Description

### Product Description:

Our PVC foil is primarily made from Polyvinyl Chloride (PVC), a kind of synthetic plastic material renowned for its durability, flexibility, and ease of processing.

It is available in a wide range of colors, patterns, and textures. It can mimic the look of natural materials such as wood, stone, fabric, or metal, providing a cost-effective alternative to these materials while still retaining high-quality aesthetics.

The foil can be applied to a variety of surfaces, including doors, cabinets, furniture, walls, and more. It adheres well to different substrates and can be used for different areas in the interior. Realsun Deco PVC foil is well known for its strength and durability and is a favorite choice in high-traffic locations.

This foil requires little maintenance once placed. It is easy to maintain and just needs to be wiped down once a week with a damp cloth. PVC decorative foil is much more affordable than natural materials, providing an upgraded aesthetic without having to incur related expenses.

Plus, manufacturers offer a wide range of styles and finishes that can be customised to meet your project specifications and personal design preferences.

Decorative PVC foil is frequently used in both residential and commercial settings for applications such as kitchen and bathroom cabinets, interior doors, wall paneling, furniture surfaces, retail displays, and more.

### Technical Parameters:

Our product comes with a thickness range of 0.1mm to 0.5mm, a width of 1260mm and 1400mm, and a length of 100-400m per roll.

We provide an extensive selection of designs such as Wood grain, Solid color, Marble, Brick and more.

Our surface treatments include Matt, Super matt, embossed, high gloss, and soft touch.

We also provide our customers with both OEM and ODM services.

### Applications:

Different Process for different application:

#### **Membrane Press (vacuum press)**
