Product Description

Product Description:

Our Deco PVC Foil is made from a synthetic plastic called Polyvinyl Chloride (PVC), which provides excellent strength, flexibility, and processing simplicity. It also has the ability to imitate real materials such as wood, stone, cloth, and metal while being more affordable and maintaining a premium appearance. Our foil comes in a range of colors, patterns, and textures which allows it to work with a variety of surfaces, such as walls, doors, cabinets, and furniture.

The foil also boasts an impressive level of durability, making it an ideal choice for high-traffic areas. And with just a weekly cleaning with a wet cloth, it is easy to maintain. This all comes at a great economical price, making our Deco PVC Foil a great option when creating a sophisticated decor without the associated high costs. Plus, because there are many styles and finishes offered, it is easy to customize it to meet individual design preferences and project requirements. Lastly, our Deco PVC Foil is widely used for wall paneling, furniture surfaces, retail displays, interior doors, kitchen and bathroom cabinets, and other uses in both home and commercial settings.

Technical Parameters:

Our product thickness ranges from 0.1mm to 0.5mm and comes with two widths: 1260mm and 1400mm. It is available in rolls of length 100m to 400m.

You can choose from a wide variety of designs such as: Wood grain, Solid color, Marble, Brick, etc. Moreover, we provide various surface treatments like Matt, Super matt, embossed, high gloss, soft touch. We also accept OEM and ODM orders.

Applications:

Membrane Press (Vacuum Press)

Thickness range from 0.20mm to 0.50mm, width from 1260mm to 1400mm and length ranging from 100m to 300m. Cover material can be MDF, particleboard, wooden board and fiberboard, used for door, kitchen cabinet, wardrobe, furniture etc. and can cover embossed board, with five surfaces covered at same time.

Wrapping Profiles

Thickness ranging from 0.12mm to 0.18mm, width from 40mm to 1260mm and length from 300m to 800m. It can be covered on all kinds of profiles, for example, wood profile, aluminum profile, and PVC profile, applying to door frame, window sill, base channel, and PVC ceiling.

Cold Laminating

Thickness ranging from 0.12mm to 0.20mm, width from 1240mm to 1260mm, and length from 300m to 500m. This method can be used to cover all kinds of flat panels, such as wood panel, steel panel, aluminum panel, and PVC panel, for the purpose of making doors and furniture.

Hot Laminating

Thickness ranging from 0.16mm to 0.30mm, width from 1260mm and length from 200m to 300m, usually use for covering PVC panel, steel panel, aluminum panel, applying to doors, skirting and so on.

Self-adhesive

It is with thickness from 0.10mm to 0.20mm, width from 600mm to 1220mm and length from 5m to 50m. It can be applied to all smooth surfaces to be used in furniture and indoor decorations.

To ensure that the PVC film arrives in good condition, it is packed in roll with wrapping foam sheet, kraft paper and plastic sheet. Furthermore, pallet packing is also available should shipping by sea or air be required.
