Product Description:

Self adhesive color vinyl is typically made from high quality, flexible PVC (polyvinyl chloride), resulting in a material that's known for its durability, flexibility, and weather resistant properties. This allows for both indoor and outdoor applications.

The vinyl sheet comes with an adhesive backing which is specially formulated, feature a strong bond while also allowing for easy application and removal. This type of vinyl is applied to wide range of surfaces, such as vehicle windows, signage, walls, banners, laptops, mobile devices, and more.

Self adhesive color vinyl is available in a plethora of colors, including solid colors, metallic finishes, and specialty finishes that provide a matte or glossy effect. With the aid of a cutting plotter or vinyl cutter, this variety allows for creative and customized designs for various projects.

The process of cutting involves "weeding", which is the removal of excess vinyl from the design, using a cutting blade that precisely cuts designs or shapes into the vinyl material based on digital vector files. Additionally, transfer tape is typically used to transfer the cut design onto the desired surface for accuracy.

In conclusion, self adhesive color vinyl provides limitless possibilities for both indoor and outdoor applications and designs. We also offer transfer tape for the weeding and transfer process. Contact us for more information.

Technical Parameters:

Our product features an incomparable thickness of 0.08mm. It is available in two widths: 1220mm and 600mm. Both sizes are available in two lengths: 50m/roll and 45m/roll. The product offers a variety of colors. Our number of Solid colors surpasses thirty. Two surface treatments, Matt and high gloss, are provided for customers to choose.

Furthermore, we offer OEM and ODM services to meet our customers' special needs. We are devoted to providing the best service possible.

Applications:

Self-adhesive color vinyl is a versatile material that can be used for various creative and practical applications. Its adhesive backing allows you to easily apply it to different surfaces. Here are some common uses for self-adhesive color vinyl:

Signage and Banners: Self-adhesive color vinyl is commonly used for creating signs and banners. You can cut it into letters, shapes, or graphics to design custom signs for businesses, events, or personal use.

Vehicle Graphics: Many businesses and individuals use self-adhesive vinyl to create vehicle graphics, including decals, wraps, and promotional messaging on cars, trucks, and even boats. It's an effective way to advertise and customize vehicles.

Wall Decals: Self-adhesive vinyl can be used to create decorative wall decals and graphics for homes, offices, and retail spaces. It's a popular choice for adding personalized touches to interior design.

Window Graphics: Self-adhesive vinyl can be applied to windows for a variety of uses, such as privacy, advertising, and window displays. For one-way window graphics, perforated vinyl is frequently utilized.

Custom Apparel: Heat transfer vinyl, or HTV, is a kind of self-adhesive vinyl that is applied to textiles and clothes to produce unique designs. Custom T-shirts, caps, and other clothing items are made with it rather frequently.

Craft Projects: Color vinyl that sticks to itself is frequently used in a variety of craft projects. It works well for making personalized labels, stickers, and other home decor products.

Promotional things: You can show logos, branding, or personalized messaging on promotional things like notebooks, water bottles, laptops, and phone cases by using vinyl stickers and decals.

Architectural Details: In architectural applications, vinyl film can be used to create faux finishes, replicate the look of wood or other materials, and add decorative elements to surfaces like doors, cabinets, and furniture.

Floor Graphics: Durable floor graphics can be created using self-adhesive vinyl. These are often used in retail spaces and events to direct foot traffic or promote products.

Safety and Wayfinding Signs: Self-adhesive vinyl is used to create safety signs, labels, and wayfinding signage in industrial settings, hospitals, schools, and public spaces.

Temporary and Seasonal Decor: Self-adhesive vinyl can be used to create temporary decorations for holidays, events, or themed parties. It's easy to apply and remove without damaging surfaces.

Sports Equipment: Self-adhesive vinyl graphics can be added to some sports equipment, such as helmets and skateboards, to add personal flair or branding.

Making the appropriate vinyl choice for your particular application is crucial when utilizing self-adhesive color vinyl (e.g., indoor vs. outdoor use, permanent vs. removable adhesive). To guarantee a clean and durable outcome, appropriate installation methods and surface preparation are also crucial. Always adhere to the directions provided by the manufacturer for the particular vinyl product you're using.

Troubleshooting

If you experience any technical difficulties with your Self Adhesive Vinyl Film, our customer service team is available to provide troubleshooting assistance. We also offer a warranty for our products to ensure your satisfaction.

Packing and Shipping:

Packaging and Shipping Self Adhesive Vinyl Film:

Self adhesive vinyl film should be kept in its original packaging or a similar packaging with a protective layer to prevent it from becoming damaged or scratched. It should be handled with care and stored away from direct sunlight, heat and moisture.

When shipping the self adhesive vinyl film, it should be carefully wrapped in bubble wrap or other protective material. It should be packed in a sturdy cardboard box or other suitable container with enough padding to protect it from any bumps or shocks. The box should be labeled clearly with the contents and the destination address.
