Basic Information

- Place of Origin: Foshan, China
- Brand Name: Realsun Deco
- Minimum Order Quantity: 3000m/model
- Price: Negotiable
- Packaging Details: Pack in roll
- Delivery Time: 15-20 days
- Payment Terms: T/T 30% down payment, 70% balance before shipment
- Supply Ability: 500000m/month

Product Specification

- Feature: Non-toxic/ Anti-Flame/ Moisture-proof
- Material: PVC
- Width: 1260mm, 1400mm
- MOQ: 3000m/model
- Design: Wood Grain, Marble, Brick, Stone And So On
- Surface: Glossy/ Matt/ Embossed/ Super Matt/ Soft Touch
- Length: 100m-400m
- Packing: Pack In Roll
- Highlight: **moisture proof decorative pvc foil,
moisture proof pvc decorative foil,
aluminum profiles wrapping decorative pvc foil**

Product Description

Product Description:

Our pvc foil is made from Polyvinyl Chloride (PVC), a synthetic plastic which is known for its excellent properties such as durability, flexibility and processability. It enables customers to achieve a high-quality aesthetic by mimicking materials such as wood, stone, fabric, or metal while keeping the costs low.

Our foil is available in different colors, patterns and textures to suit various preferences. It can be applied to multiple surfaces, such as doors, cabinets, furniture, and walls. Moreover, the strength and resilience of the foil make it ideal for areas with high-traffic flow.

Minimal effort is required when it comes to maintenance – usually a moist cloth is enough to get rid of dirt and dust. Additionally, the price of using pvc decorative foil is very low, making it possible for customers to have an upscale look without breaking the bank.

The current selection of styles and finishes are great for meeting project specifications and adjusting to personal design preferences. Last but not least, it is commonly used in residential and commercial locations for cabinet making, wall panelling, interior doors, furniture surfaces, retail displays and more.

Technical Parameters:

RONSHENG PVC FILM

RONSHENG PVC FILM offers thickness from 0.1mm to 0.5mm and widths of 1260mm and 1400mm, 100-400m/roll in length.

Furthermore, customers have access to a vast selection of designs including Wood Grain, Solid Color, Marble, Brick and more.

Additionally, optional surface treatments are available such as Matt, Super Matt, Embossed, High Gloss, and Soft Touch.

As a trusted leader in PVC Film Services, RONSHENG also provides OEM and ODM services to meet customer needs.

Applications:

Different Process for different application

Membrane Press (vacuum press): This technique is used to cover materials such as MDF, particleboard, wooden board, fiberboard, etc for doors, kitchen cabinet, wardrobe, furniture, etc. It can also cover embossed board and cover five surfaces at the same time. The thickness of the layers ranges from 0.20mm to 0.50mm, the width is 1260mm and 1400mm, and length is from 100m to 300m per roll.

Wrapping Profiles: This technique is used to cover all kinds of profiles including wood profile, aluminum profile, PVC profile, etc for door frame, window sill, base channel, PVC ceiling, and so on. The length, thickness and width of the layers ranges from 300m to 800m, 0.12mm to 0.18mm, and 40mm to 1260mm respectively.

Cold Laminating: This technique is used to cover all kinds of flat panels like wood panel, steel panel, aluminum panel, PVC panel, etc for doors and furniture. The thickness of the layers is 0.12mm to 0.20mm, the width is 1240mm to 1260mm, and length is from 300m to 500m per roll.

Hot Laminating: The thickness of the layers of this technique is ranged from 0.16mm to 0.30mm, the width is 1260mm and length is from 200m to 300m per roll, and can be used for covering PVC panel, steel panel, or aluminum panel for doors, skirting and so on.

Self-adhesive: This technique can be stuck to any smooth surface for furniture and indoor decorations. The length of the layers is between 5m to 50m per roll, and the thickness and width ranges from 0.10mm to 0.20mm and 600mm to 1220mm respectively.

Packing and Shipping:

PVC Decorative Film Packaging and Shipping
The PVC Decorative Film products are packed in individual rolls. Each roll is labelled with product information, including size, weight, quantity, etc. The rolls are secured with tape and placed in large pallets for storage and shipping. All pallets are wrapped with shrink wrap to protect the contents from the elements. The pallets are then loaded onto trucks for delivery to the customer.
