- MOQ: 3000m/model
- Highlight: **oem pvc interior film, oem pvc decorative film, 1260mm pvc interior film**

Product Description

Product Description:

Our pvc foil is primarily made from Polyvinyl Chloride (PVC), a synthetic plastic material known for its durability, flexibility, and ease of processing.

It is available in a wide range of colors, patterns, and textures, providing a cost-effective alternative to the look of natural materials such as wood, stone, fabric, or metal, while retaining a high-quality aesthetic.

Versatility is one of its most attractive features, as it can be applied to a variety of surfaces, including doors, cabinets, furniture, walls, and more. It adheres well to different substrates and can be used in different areas in interior.

The foil is renowned for its resilience to deterioration and strength, making it often used in high-traffic locations. Our foil is simple to maintain and usually just has to be wiped down once a week with a moist cloth.

Pvc decorative foil is budget-friendly in comparison to natural materials, enabling people to create upscale aesthetics without incurring the related expenses. Furthermore, a large range of styles and finishes are available from manufacturers, enabling modification to meet project specifications and personal design preferences.

Decorative pvc foil is commonly used in residential and commercial settings for applications such as kitchen and bathroom cabinets, interior doors, wall paneling, furniture surfaces, retail displays, and more.

Technical Parameters:

Our PVC film is available in thickness from 0.1mm to 0.5mm, and width from 1260mm to 1400mm. The length of the roll can range from 100m to 400m.

We offer designs in wood grain, solid color, marble, brick and more.

Surface treatments can range from matt, super matt, embossed, high gloss, and soft touch.

We provide OEM and ODM service.

Applications:

Different Process for different application

1.Membrane Press (vacuum press): with a thickness of 0.20mm-0.50mm, width of 1260mm and 1400mm and length of 100m-300m/roll, membrane press is used for covering MDF, particleboard, wooden board, fiberboard, etc., apply for doors, kitchen cabinets, wardrobes, furniture and more, as well as embossed board to cover all five surfaces at the same time.

2.Wrapping Profiles: from 0.12mm-0.18mm in thickness, 40mm-1260mm in width and 300m-800m/roll in length, wrapping profiles are used for all kinds of profiles, such as wood profiles, aluminum profiles, PVC profiles, and more, to cover on door frames, window sills, base channels, PVC ceiling, etc.

3.Cold Laminating: with a thickness of 0.12mm-0.20mm and width of 1240mm and 1260mm and length of 300m-500m/roll, cold laminating is used to cover wood board, steel panel, aluminum panel, PVC panel, etc., apply for doors and furniture.

4.Hot Laminating: with a thickness of 0.16mm-0.30mm, width of 1260mm and length of 200m-300m/roll, hot laminating is used to cover PVC panel, steel panel and aluminum panel, apply for doors, skirting and the like.

5.Self-adhesive: having thickness from 0.10mm-0.20mm and width of 600mm/1220mm and length of 5m-50m/roll, self-adhesive can be put on any smooth surface for furniture and indoor decorations.
